## VitrA Concealed Cisterns

Fit easily, forget confidently

VitrA

We progressively invest in essentially  
human spaces - the bathrooms.

### **The complete bathroom**

Exploring physical and emotional needs, Vitra invests in design to produce every essential element in the bathroom.

### **It's all about inspiration**

It all begins with questions posed by the design discipline to understand needs, desires and choices. Designed by Vitra, an extraordinary wealth of attractive combinations help satisfy these needs and desires.

### **High powered perfection**

Seven cutting-edge factories and plants in Turkey and Russia, create sophisticated designs and maintain extremely high standards, whilst progressively reducing Vitra's ecological footprint.

### **Collaboration with designers**

Vitra works with acclaimed industrial designers from around the world. Not only does the collaboration with these top talents improve product functionality, but it also introduces an entirely original range.

### **Vitra across the world**

Bathroom designs greet customers around the world through 2000 sales points in over 75 countries, including 150 exclusive Vitra showrooms in Istanbul, London, Cologne, Moscow, Dubai, Mumbai, Delhi, and other major cities.

### **Technology lights up the future**

The Vitra Innovation Centre serves as the headquarters of the brand's R&D activities with a strong engineering team, leading the bathroom industry with new solutions and technologies.

### **Improved personal hygiene**

Vitra's continuous research into human health introduces new technologies for improved hygiene in the bathroom. These solutions raise the personal hygiene experience to a new level.

### **A pledge to the future**

Vitra embraces Blue Life, a set of guidelines devised to mitigate our impact on the environment, and is held as a production, design and management philosophy.

# From more than 20 years' experience to the future of bathrooms

VitrA strives for an excellence that goes way beyond the surface of our products. In fact, from design to production and customer service we aim for nothing less than perfection at every stage.

Thanks to our many continuous improvements, VitrA Concealed Cistern features provide added value to installations.

The solution hidden inside the wall changes and expands the perception of space, it still works accurately and quietly after decades as it did on installation. VitrA provides concealed cistern solutions for every wall and WC types with a strong flush and quick refilling – quiet, reliable and long term. Moreover, our history of many years engineering, rigorous internal tests and numerous external certification processes are what gives complete confidence in VitrA brand.

Also, VitrA Concealed Cisterns provide hygienic and reliable experiences for every bathroom thanks to their compatible assembly options. Benefit from our extended 10 year warranty for core products and retrofitting offer for conversion of up to 30-year-old concealed cisterns.

# Highlights in VitrA Concealed Cisterns

# Designs united with architecture

Pure and intuitive design language of products that is ergonomic and visually distinctive. All elements are styled to perfection.

Cisterns adapt all kinds of the wall with models that suitable for both brick and drywalls. It also provides aesthetic and reliable solutions for toilets including wall-mounted, back-to-wall, single, child and even squatting pans with different thickness options in V8, V12, and VPro series as 8 cm, 12 cm or 10.5 cm.

VitrA VUni series are developed for different height options and are ideal for small spaces. Moreover, the Vitrus and Renoform series offer easy access to an elegant looking bathroom for those who want to quickly transform their bathroom with a concealed cistern.

Choose different design, colour and functionality options with VitrA control panels that can operate using pneumatic, mechanic, touch-free or smart technology – the very first smart panel in the bathroom industry.

# VitrA Concealed Cisterns

Fit easily, forget confidently

## VitrASilent Concealed Cisterns

---

By special filling system the cistern filling sound does not exceed 19 db and stays in the range of valve group I. Thanks to the system that instantly cuts off the filled water, disturbing noises are prevented during the cutting process.

The styrofoam on the product provides extra insulation and so that provides a quiet use both in the bathroom and in the connected living quarters.

## 10 years guarantee and 30 years spare part availability

---

Qualified, durable, and sustainable VitrA products create highly functional and reliable solutions. The durability of VitrA concealed Cisterns is backed up by VitrA's high technology standards and engineering. In addition to the 10-year warranty, a 30-year spare part supply guarantee is also provided for each concealed cistern. VitrA always allows the purchase of spare parts to maintain the continued function of a VitrA Concealed Cistern for up to 30 years from the manufacturer's date of sale.

## Adjustable flush volume

---

With its inner tool settings, the adjustable flush in Vitra Concealed Cisterns reduces flush volume easily by changing the full flush volume to meet individual requirements. Good for the environment: Thanks to a real dual-flush system, the partial flush stays constant with a water-saving 2,5 or 3 litres.

## Control panel flexibility

---

Control panels in different colours and designs provide functionality within elegance. In addition to pneumatic and mechanic control panels, touch-free panel options offers more hygienic solutions. On the other hand, the smart panel embodies Vitra as a pioneer in the sanitary sector.

# Durable products, higher standards

VitrA Concealed Cisterns' durability and performance have been tested by international standards organisations and meets the DIN EN 14055 European standard for cisterns, and certified for many countries for long-lasting faultless usage.

# VitrA assurance in security and performance

VitrA Concealed Cistern developed with high technology undergoes quality, performance and reliability tests such as strength and stability, durability, resistance to temperature fluctuations, and resistance to frost and water contraction.

## Leak test

All products undergo the leak test with the water filled into the cisterns at VitrA facilities.

## Flow test

Discharge rate and water level are very important for a good cleaning. Therefore VitrA laboratories perform tests at regular intervals with international standard flow rates (2L/sec).

## Overflow test

The part that acts as a safety valve in the discharge mechanism is the overflow pipe. This pipe is tested over and over again at different pressures, with incoming water at different intervals.

## Weight test

Cisterns used with wall-mounted WC pans should support not only the user but also the force exerted by the person. Built-in cisterns are specially designed in laboratories and tested up to 500kg.

## Function test

All products undergo functionality testing at VitrA production facilities and all functions are checked.

## Life test

One of the most important measure of quality is longevity. VitrA Concealed Cistern products undergo world-class life tests. No part should stop performing even after 200,000 consecutive uses.

Vitra

# Perfect for bathroom design, ideal for quick and easy installation

With engineering behind, Vitra Concealed Cisterns are perfect products with their well-thought-out features that guarantee faultless operation following many years of continuous improvement.

## Highlights

- Statically self-supporting and durable up to 500 kg.
- Assembly options to dry and brick wall.
- Available for wall-mounted, back-to-wall, single WCs and also for squatting pans.
- 2.5/4 L and 3/6 L flushing options.
- Complies with sound insulation standards.

Powder-coated assembly steel frames.

The styrofoam coating over the body prevents condensation.

Conduit pipe for electrical cable transmission to conceal wiring for electrical products.

Bore holes for accommodating additional wall attachments in barrier-free toilet systems.

Sturdy, wide area crossbeams with junction box and wall connection parts for holding the ceramics securely.

Practical foot brakes for adjusting the module height allows one person assembly.

Stamped-in 1 metre mark, permanently visible and also provided as a sticker.

Easy access to interior parts during service opening.

The flexible PPRC body resistant to variations in temperature, breaking and cracking.

Conduit pipe for water supply connection in shower toilets

Integrated junction box for supplying power to electrical products.

Adjusted foot supports for floor projections of 0cm to 20 cm attachments.

# Simply unpack and install

With cisterns of different thicknesses and heights, for easy and quick assembly done in a faultless way. In every thickness, there is a suite of options for different wall and WC types. The modules can be installed in homes as well as the hotel or healthcare sector.

## Brick wall modules

Vitra V8, V12 concealed cisterns - the module for pre-wall brick wall assembly.

## Drywall modules

Pre-assembled sanitary installations for assembly in cavity wall systems, in metal or wooden stud walls, or free-standing in front of the wall.

## Highlights

- Available for installation to brick or dry walls.
- Available in versions for VPro, V12, V8 cisterns with 10 cm, 12 cm and 8 cm thicknesses.
- Cisterns full pre-assembled and sealed.
- Lower installation height options of 82 cm and 98 cm in Vitra VUni cisterns.
- Available for wall-mounted, back-to-wall, single WCs and also for squatting pans.
- Metal construction frames are also available for washbasins, urinals and bidets.

# Modules for every situation

VitrA Concealed Cisterns offer technological solutions for different requirements. Here are our most popular models:

**VPro, V8, V12**

Concealed cistern WC Frame for wall-mounted WC pans, with shower toilet conduits, wall and floor fitting.

**VPro, V8, V12**

Concealed cistern WC Frame for wall-mounted WC pans, with shower toilet conduit, floor fitting.

**V8, V12**

Concealed cistern WC Frame for wall-mounted WC pans, floor fitting.

**V8, V12**

Back to Back Concealed cistern WC Frame for wall-mounted WC pans, floor fitting.

**VUni**

Concealed cistern WC frame for wall-mounted WC pans, in 82cm and 98cm height options.

**VPro, V8, V12**

Concealed cistern for wall-mounted WC pans, adjustable thick metal brackets

**V8, V12**

Concealed cistern for wall-mounted WC pans, adjustable thin metal brackets.

**V8, V12**

Concealed cistern for wall-mounted WC pans, without metal brackets.

**V8, V12**

Concealed cistern for floor standing back-to-wall and child WC pans.

**V8, V12**

Concealed Cistern for squatting pans

# Upgraded VitrA Concealed Cisterns for easy, quick and faultless assembly

VitrA Concealed Cistern assembly is now easier and quicker with the latest innovations. Besides reducing installation times, building on VitrA engineering knowledge, VitrA Concealed Cisterns offer installers problem-free installation. Save time and money by spending less time on installation.

## Wall connection fixing set

Quick assembly to the wall, with sensitive front depth and wall adjustment.

## Height positioning markers

100 mm and 32 mm height stickers that provide accurate and easy cistern and WC installations without any need for measurement.

## Reference markers

Marking drywall for quick installation by reference points on V stopper and protection box.

## Adjustable clamp

Preventing incorrect assembly and giving a more durable installation via fitting clean water pipe.

## Adjustable floor fitting

Adjust height easily and precisely, done by just one person.

### Faster than ever flush plate installation

With easy fit, the flush plate can be installed in one go. Without adjustment or remeasuring, simply insert and lock in place. Insert the screws, push them through and tighten them with just a few turns.

### Tool-free flex

Manual installation of flex with no need for tools. The O-ring inside the flex ensures it is leak proof.

### Easy waste pipe assembly

Providing easy installation regardless of the distance between the drainage pipe and the concealed cistern.

Thanks to the levels on waste pipe, fixing clamp and adapter, the waste pipe can be moved 80 mm in total.

By attaching the adapter to the clamp, it is possible to pull through to the back.

With the adapter provided, 10 mm of movement is provided forward and backward in the pipe axis.

# See the future of bathrooms

VitrA Concealed Cisterns upgrade the bathroom to a technological place effortlessly. The upgraded system allows customers to change their mechanic products to electrical ones easily without breaking the wall, even after years, with no problem.

# Bathrooms are ready for future with Vitra Concealed Cisterns

Vitra Concealed Cisterns optimally prepared for the comfort demands of today and tomorrow. With the water and electrical conduit pipes, junction box and touch-free panels, shower toilets can easily be retrofitted without any need to damage walls. With conduit pipes for water connections and positions for electrical connection, just trust the technology beneath.

Vitra embodies the bathrooms of tomorrow and are pre-packed with technology, ready for smart products and to provide a universal shower toilet connection.

# VitrA VPro Concealed Cisterns more durable body, quieter cistern

Thanks to well-thought-out body design, VitrA VPro Concealed Cisterns are more durable to withstand pressure than ever and function more silently due to its extra sound isolation.

# Most silent cistern ever

VPro Concealed Cisterns have 10.5 cm body thickness and a special two-piece angle valve. Moreover, they can operate with either pneumatic or mechanic control panels and function in 2.5/4 L or 3/6 L options.

Dry wall usage with wall and floor fitting, wall-mounted WCs.

Dry wall usage with floor fitting, wall-mounted WCs.

Brick wall usage with wall and floor fitting, wall-mounted WCs.

# VitrA V8 and V12 Concealed Cisterns suitable modules for everywhere

VitrA's V8 and V12 Concealed Cisterns meet the requirements of every bathroom and construction project. With two different thickness options as 8 cm and 12 cm, V8 and V12 Concealed Cisterns have solutions for different wall and WC types in their ranges.

Vitra

Dr. In-Action Manual  
in English, German,  
and French available

Vitra

CAUTION

Attention: The unit is heavy and must be supported during installation. The unit must be supported by a structure capable of bearing the weight of the unit.

# Fits in every way to everywhere

Either drywall or brick wall, Vitra V8 and V12 Concealed Cisterns fit everywhere with their range of product options. Besides having pneumatic and mechanical control panel usage options, V8 and V12 Concealed Cisterns also offer 2.5/4 L and 3/6 L flushing solutions.

Consisting two concealed cisterns with floor fitting.

Floor fitting cistern that is suitable for installation even there is no cavity wall.

Floor fitting cistern that is suitable for installation with cavity wall.

Concealed cistern with floor and wall fixation.

The broad product options of V8 and V12 Concealed Cisterns fit not only wall-mounted WCs, but also back-to-wall, single WCs and even squatting pans.

Concealed cistern with adjustable thick metal brackets.

Concealed cistern with adjustable thin metal brackets

Concealed cistern with adjustable thin metal brackets

Concealed cistern suitable for floor standing, child and single WCs.

Concealed cistern suitable for squatting pans.

# VitrA VUni Concealed Cisterns

To install a wall-mounted WC below a window or under an inclined roof, the installation height of the cistern may cause a problem. Now, there is the perfect solution in the VitrA VUni cistern.

## The flexible solution for a customized bathroom

### Three installation heights

The newly developed Vitra VUni Concealed Cisterns which are one-piece body that is produced with blow-moulding technology can be installed at heights of 82 cm, 98 cm or 112 cm which delivers outstanding flush performance every time. A water-saving dual flush conserves valuable resources and helps the cistern achieve maximum efficiency.

### Top/front actuation

With a maximum depth of 21 cm and minimum depth of 15.5 cm, the Vitra VUni Concealed Cistern is compatible with all alcove situation. It can be connected to the water supply from either the back or the side and it's suitable with all Vitra mechanical control panels. Depending on the construction situation, the actuator plate that activates the flush can be installed to the top or front of the cistern. No special tools are required to install the cistern or install the actuator plate.

# VitrA Vitrus Pre-wall Cisterns

With the VitrA Vitrus Pre-wall Cisterns, find the perfect solution for new construction or renovation. Installation takes less time and causes less construction dust and noise.

## A new WC in just a few hours

Vitra Vitrus Concealed Cisterns facilitate the fast renewal of a complete WC system and are therefore also perfect for modernising older bathrooms with exposed cisterns. Installation can be carried out by a single plumber within a few hours and causes minimal construction dust and noise. Especially during bathroom renovations, Vitra Vitrus proves to be the perfect solution.

## Cleverly designed, proven technology

A cistern with a water-saving dual flush and a connection to the water supply are located inside the Vitra Vitrus Cistern. Vitra provides a stepped straight connector for converting a floor-standing WC with a wall inlet to a wall-mounted WC.

## Modern design and easy installation

With 115 cm x 50 cm x 12 cm dimensions and 2.5-4 L and 3-6 L flushing options, Vitra Vitrus sanitary module is compatible with wall-mounted and back-to wall WC pans. The front opening cover provides easy access while maintaining the wall in place. It has mechanic chrome flush plates, stop valve and bidet hand shower options with two colour options: black and white.

## Quick and clean installation for renovations

- 2.5-4 L & 3-6 L flushing options.
- Complete unit with dual-flush technique and all connections.
- Suitable for all common wall-mounted and floor standing WCs, as well as Vitra V-Care shower toilet.
- Color options: Black, white.
- Mechanic chrome flush plate.
- The front opening cover provides easy access while maintaining the wall in place.
- Stop valve and wide hand shower alternatives.

# VitrA RenoForm Pre-wall Cisterns

A platform to simplify toilet refurbishment with touch-free products.

The corrosion-resistant aluminium composite platform allows the assembly of electronic and smart products without wall and substructure renovation. Easy access to the electronic and mechanical parts and compatibly with V-Care Smart Panel.

Vitra

Vitra

## New touch-free toilet experience

- 6 cm and 10 cm pre-wall thickness options.
- Touch-free bidet sensor, solenoid valve and water pipe mounted on the product.
- Colour options; black, light grey.
- Maintenance work of filling valve and flush valve can be done without using any tools.
- Compatible with only V-Care Smart Panel.

## Smart installation

RenoForm is a refurbishment platform which enables the installation of electronic and smart products without the need for wall and infrastructure renovation, thereby simplifying the installation of touch-free products.

Power is carried into the platform with one single cable before updating the toilet area to a touch-free one. In addition to simplifying installation RenoForm also allows for rapid and easy maintenance thanks to a service hatch at the side.

## Fit and durable body

RenoForms with slim body for wall-mounted WCs, use the existing concealed cistern infrastructure, as opposed to the cistern in other types of WCs which is lifted into the platform. VitrA RenoForm is made of aluminium composite material and exterior of the platform is resistant to cleaning chemicals and corrosion.

# VitrA Metal Frames offer solutions for all kind of construction

Whether this is work with a special client or in any construction situation, VitrA Metal Frames are here to help! They have alternative solutions for drywall to washbasin, urinal and bidet installation.

Metal frames are practically offer easy installation for built-in washbasin faucets, urinals, concealed mechanic and electronic washing systems.

They can also be configurable with all urinals and washbasins.

# Suitable for every installation situation

With Vitra Metal Frames, there is always an alternative practical solution for drywall installations of washbasins, urinals and bidets.

**Frame for urinal**  
Suitable for urinal installation.

**Frame for urinal with flusher**  
Suitable for urinal installation.

**Frame for washbasin**  
Suitable for washbasin installation.

**Frame for washbasin  
with built-in mixer**  
Suitable for basin and  
built-in basin mixer installation.

**Frame for bidet**  
Suitable for bidet installation.

**Frame for bidet with  
built-in mixer**  
Suitable for bidet and  
built-in basin mixer installation.

# VitrA Control Panels with different design, colour and function alternatives

VitrA Control Panels stand as matching components for cisterns with their form and function choice flexibility, suitable with all kinds of VitrA Concealed Cisterns.

# Aesthetic and functional

Wide control panel range for the best choice in bathrooms. Select Vitra Control Panels and live happily for years to come.

Smart Panel					<ul style="list-style-type: none"> <li> Black</li> <li> Matt black</li> <li> Taupe</li> <li> White</li> <li> Mink</li> <li> Chrome</li> <li> Matt chrome</li> <li> Golden</li> </ul>
